Art Unit: 2852

DETAILED ACTION

Drawings

- 1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 37, 37a, 37b (Figure 1), 71d (Figure 2), 40s (Figure 3), 100, 113 (Figure 5), 45j (Figure 6). Corrected drawing sheets, or amendment to the specification to add the reference character(s) in the description, are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
- 2. The drawings are objected to because of the following informality: Figure 2, reference numeral 108, "OC" should be "DC". Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and

Application/Control Number: 10/643,930

Art Unit: 2852

appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Page 3

Specification

- 3. The abstract of the disclosure is objected to because of the inclusion of legal phraseology, such as "means" (page 27, lines 6, 14, and 18). The abstract is also objected to because it exceeds 150 words. Correction is required. See MPEP § 608.01(b).
- 4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
- 5. The disclosure is objected to because of the following informality: Page 22, line 26, "S110" should be "S111". Appropriate correction is required.

Art Unit: 2852

Claim Objections

6. Claims 6-9 are objected to because of the following informality: Claim 6, line 3, "the recording material" should be "a recording material". Appropriate correction is required.

Claim Rejections - 35 U.S.C. §102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 3-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Nishida et al. (US Pat. No. 6,301,454)

The patent discloses an image fixing apparatus comprising: a first heater 2 for generating heat for fixing a toner image on a recording material 23; a first control means CPU for controlling electric energy supply to the first heater (Figure 11), the first control means CPU effecting phase control of the electric energy supply upon start of the electric energy supply (column 7, line 61 to column 8, line 21; Figure 6); a second heater 3 for generating heat for fixing the toner image on the recording material 23; second control means CPU for controlling electric energy supplied to the second heater 3, the second control means CPU effecting phase control of the electric energy supply

Application/Control Number: 10/643,930

Art Unit: 2852

upon start of the electric energy supply, wherein when both of the first heater and the second heater are operated, the phase control for the second heater is started after completion of the phase control for the first heater (column 7, line 61 to column 8, line 21; Figures 6 and 18); the first and second control means CPU effect the phase control on the basis of zero-cross time of a commercial electric source (column 10, lines 45-49); and the first and second control means CPU reduces an electric power supply angle in the phase control upon the start of the electric power supply (Figure 18).

Allowable Subject Matter

- 9. Claims 6-9 are allowable over the prior art; however, it is found to be objectionable for the reason specified above.
- 10. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach or suggest an image fixing apparatus comprising the phase control for the second heater of a second rotatable member is started after completion of the phase control for the first heat of a first rotatable member.

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2852

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Response to Arguments

12. Applicant's arguments filed 4/26/04 have been fully considered but they are not persuasive.

Applicant argues that independent claims 3 and 6 are patentable over the applied art of record. The examiner believes the new added claims 3-5 are rejected over Nishida et al. See above rejection.

Other Prior Art

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kataoka (US Pat. Pub. No. US 2002/0061202 A1) discloses an image fixing apparatus comprising a first rotatable member having a first heat; a second rotatable member having a second heater; and control means effecting the phase control of the first and second heaters.

Ogawara (JP 2000-268939) discloses an image fixing apparatus comprising a first heater; a second heater; and control means effecting the phase control of the first and second heaters.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sophia S. Chen whose telephone number is (703) 308-7617. The examiner can normally be reached on M-F (7:00-3:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Arthur Grimley can be reached on (703) 308-1373. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
